Drive safely with your child by following these simple tips…

**Booster Seats** (For most children from 4 - 8 years old.)

- **Child’s head is supported by back of booster**
- **Shoulder strap is across shoulder and over the**
- **Lap belt is low and snug on upper thighs**

**High-backed Booster Seat**

- **Child’s head is supported by vehicle seat back**

Based on graphics provided by SafetyBeltSafe U.S.A.

The Nissan safety reference card is designed to assist in correct child passenger safety seat use.

If your safety seat cannot be properly installed in your vehicle, or if your child does not fit in the safety seat properly, you should try another safety seat.

For a comprehensive guide to child safety seat installation and use, consult your child safety seat and vehicle manuals.

ALL CHILDREN 12 AND UNDER SHOULD ALWAYS RIDE IN THE BACK SEAT.
Rear-facing Infants

(Infants must face rearward until they are at least 1 year old and 20 lbs. NEVER PUT A BABY IN FRONT OF AN AIR BAG.)

Important Tips for Correct Safety Seat Use

- Harness straps are very snug - no slack or twists in the straps
- Chest clip is at armpit level
- Vehicle seat belt is very tight, in correct location shown in instructions
- Safety seat cannot be pushed or pulled toward front or sides of car (no more than 1 inch)
- Children should ride in a safety seat with a harness as long as it fits (usually up to about 4 years/40 lbs.)

ALL CHILDREN 12 AND UNDER SHOULD ALWAYS RIDE IN THE BACK SEAT.
